Introductory Seminar

December 16th-18th, 2024

The Pharma-Lizen-Club Deutschland (PLCD) is offering its introductory seminar "Licensing & Business Development" from December 16th to 18th, 2024.

The aim of this seminar is to help you and your organisation with the following:

- Establishing links between company strategies and licensing strategies
- Optimising the structure and flow of your business development processes
- Finding the right licensing partner
- Learning to deal better with the pitfalls of intellectual property rights
- Properly evaluating license offers and risks from a financial perspective
- Improving your negotiation strategies and tactics

The seminar is primarily directed at employees in the pharmaceutical industry and the biotechnology sector who are new to working in the area of business development, as well as employees who want to obtain a thorough overview of business development and licensing as a whole, or those who want to refresh their knowledge.

For the seminar, we were able to recruit well-known speakers from leading pharmaceutical companies with many years of experience, as well as proven experts for specialist questions.

One part of the seminar is a case study, which then serves as a common theme running across the course. Through this case study, you will practice the critical assessment of licence offers, as well as valuation and negotiation tactics.

The talks will be given in English. The case study will be conducted in English.

A program overview and registration form are attached. To achieve optimal value for the participants and facilitate efficient group work, the number of participants in the seminar is limited to 20 people.
